

PARENT GUIDE

How to log in & change your mobile number

A step-by-step walkthrough for parents using the Inventre school store on their phone.

inventre.online

Last updated: 2026-05-28

What do you need to do?

SECTION A I'm logging in for the first time.

SECTION B I'm already logged in and want to change my mobile.

SECTION C I don't remember which mobile is on file (or never registered).

SECTION D Something's not working — troubleshooting.

Before you start: Keep your **10-digit mobile number** ready. If you have a new SIM, you'll also need access to the *old* number or your registered email for a one-time verification.

Section A — First-time login

Use this when the school has just added your child and you've never signed in before.

1

Open the website.

Visit **inventre.online** on your phone or laptop and tap *Sign in*. You'll land on the screen on the right — a single field for your mobile number.

PARENT SIGN-IN

Welcome.

Enter your mobile number — we'll text you a code or take you to your password.

Mobile number

+91

98xxxxxxx

Continue →

[Privacy](#) [Terms](#)

2 Type your 10-digit mobile number.

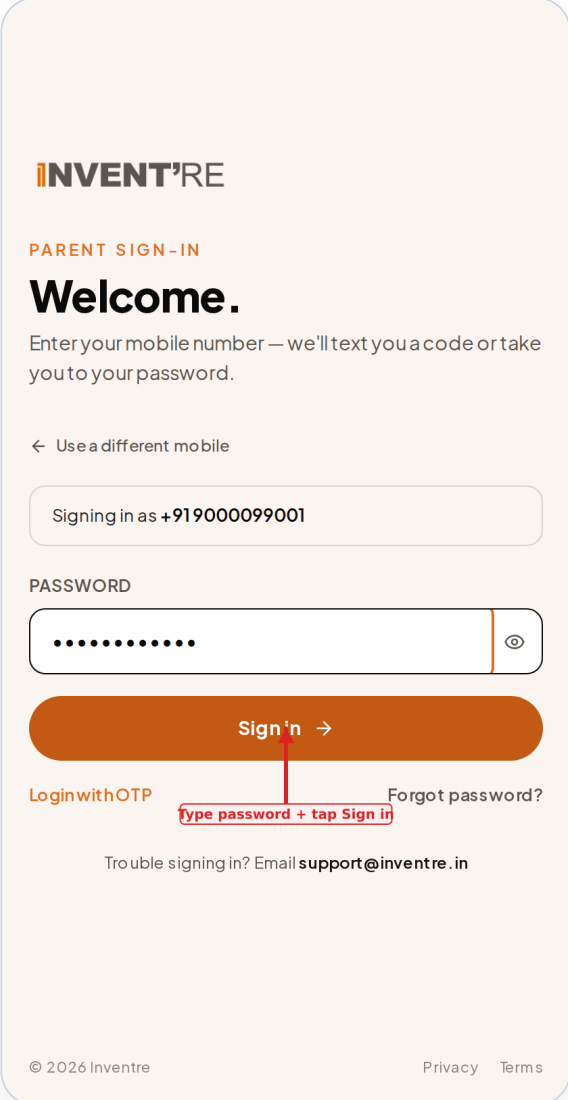

No spaces, no +91 — just the 10 digits. Then tap *Continue*.

The website auto-removes spaces, dashes and the +91 prefix, but the underlying number must be exactly 10 digits.

3 Enter your password (or the OTP, for first-time users).

If you're signing in for the very first time you'll be asked for a 6-digit OTP that arrives on your mobile. Then you'll set a password.

If you already have a password, just enter it and tap *Sign in*.

The image shows a mobile app login screen for iNVENT'RE. At the top is the logo. Below it is the text 'PARENT SIGN-IN' and a large 'Welcome.' heading. A sub-header says 'Enter your mobile number — we'll text you a code or take you to your password.' There is a link '← Use a different mobile'. A field shows 'Signing in as +919000099001'. Below is a 'PASSWORD' field with masked dots and an eye icon. A large orange 'Sign in →' button is centered. Below the button are links for 'Login with OTP', 'Forgot password?', and a red callout box pointing to the button that says 'type password + tap Sign in'. At the bottom, there is a link 'Trouble signing in? Email support@inventre.in' and footer text '© 2026 Inventre', 'Privacy', and 'Terms'.

Tip: Once you've set your password, future logins only need the mobile + password — no OTP — unless you reset.

Section B — Change your mobile (already logged in)

Use this when you can sign in with your current number and just want to switch to a new one.

- 1 Sign in as usual at **inventre.online**.
- 2 Tap your **profile icon** at the top right and choose *My account*.

You'll land on the dashboard shown on the right — your current mobile number is masked with the *Change* button next to it.

INVENT'RE

← Back to account

CHANGE PHONE NUMBER

Enter your new number

Current: +9190000 99001

NEW MOBILE NUMBER

9876543210

Send OTP to new number

We'll text a 6-digit code to confirm you own the new number. **Type new mobile + tap Send OTP**

3 Type your new 10-digit mobile.

Tap *Send OTP*. A 6-digit code will arrive on the **new** number within a minute.

We send the OTP to the **new** number so we know you really have access to it before the switch.

4 Enter the 6-digit OTP that arrived on the new number.

Tap *Verify*. You'll see a confirmation screen and from your next login you'll use the new mobile.

INVENT'RE

Verify & update

← Use a different number **Enter OTP + tap Verify** Resend in 29s

Branded for your school Free 7-day returns

Tip: Your old number stays in the system as a backup guardian contact until you ask the school admin to remove it. This is helpful if you ever need to recover access.

Section C — "I don't remember which mobile is on file"

Use this when you can't sign in because the registered mobile is wrong, changed, or unknown.

- 1 Open **inventre.online** and tap *Sign in*.
- 2 At the bottom of the login screen, tap **"Recover, change or add a mobile via student details"**.

STEP 1 — FIND YOUR CHILD

Search by school, grade & name

Pick your child below — we'll show the last 4 digits of the number on file so you can use it to log in.

Select school

Pick a school (Pick school + grade)

Student's name or last 4 digits of mobile (mi)

Typos, partial words, or any order are OK. You can also search by the last 4 digits of the registered mobile number.

STEP 1 — FIND YOUR CHILD

Search by school, grade & name

Pick your child below — we'll show the last 4 digits of the number on file so you can use it to log in.

St. Michaels School

Grade 12 **3. Type name or last 4 digits**

Student's name or last 4 digits of mobile (mi)

Typos, partial words, or any order are OK. You can also search by the last 4 digits of the registered mobile number.

3 Pick your child's **school** from the first dropdown.

4 Pick their **grade** from the second.

If you don't see your grade, double-check the school's spelling — some appear under variants (e.g. "St. Michaels" vs "St. Michaels School").

5 Type at least 3 letters of your child's name.

Spelling doesn't have to be perfect — the search forgives typos, accepts words in any order, and you can even type the **last 4 digits of the registered mobile number** instead of the name.

6 Tap your child's row. We mask the mobile on file with only the last 4 digits visible — enough to confirm it's the right account without exposing the full number.

STEP 1 — FIND YOUR CHILD

Search by school, grade & name

Pick your child below — we'll show the last 4 digits of the number on file so you can use it to log in.

St. Michaels School

Grade 12

aar

Typos, partial words, or any order are OK. You can also search by the last 4 digits of the registered mobile number.

Tap your child's row

7 Verify it's you. Pick one of two methods:

- **OTP to the old mobile** — use this if you still have access to the registered number.
- **OTP to your registered email** — use this if the mobile is gone.

8 Pick what to do next:

- **Change my number** — replaces the old one (use this for a new SIM).
- **Add as extra guardian** — keeps the old number and adds yours as a second contact.

9 Enter the new 10-digit mobile, verify the OTP, and you're done.

Section D — Troubleshooting

OTP didn't arrive

- Wait a full minute — SMS delivery sometimes lags.
- Check that you typed the mobile correctly (10 digits, no spaces, no +91).
- Make sure your phone has signal and SMS isn't blocked by a DND setting on your mobile network.
- Tap *Resend OTP*. The timer resets after 60 seconds.
- For email OTP, also check the spam folder.

"No matching students found" when I search by name

- Type just the first 3 letters of the first name (e.g. *sun* for Sunith).
- Try the **last 4 digits of the registered mobile** instead — it's the most reliable.
- Double-check the school and grade — children appear under one exact grade only.

I see the wrong child / wrong mobile in the search results

- Stop. Don't proceed with the recovery — you'd change the wrong family's number.
- Contact your school admin and they'll fix the mapping.

"Mobile number must contain 10 digits"

- The site removes spaces, dashes and +91 from what you type, but the underlying number must be exactly 10 digits.
- "+91 98765-43210" is fine. "98765-43" is not — it's only 7 digits.

Still stuck? Reach out to your school's Inventre coordinator with: your child's name, school, grade, and the mobile number you'd like on file. They can update it for you directly.
